boiler

Boiler Scrappage Scheme

To reduce carbon emissions produced by inefficient old boilers the Government is offering 125,000 households £400 towards the cost of replacing their boiler.

The boiler has to be replaced with either a new A-rated energy efficient condensing boiler, or a renewable heating technology such as Solar Thermal Water Heating or a Heat Pump.

Criteria of the Scheme

- The scheme is only available in England.
- You have to be a homeowner or rent from a private landlord.
- Your existing boiler has to be either G-rated, the equivalent or worse.
- Can only claim for the main boiler in the house.
- Your boiler has to be replaced with either an A-rated condensing boiler or a renewable heating technology.
- If you are replacing with an A-rated condensing boiler the installation has to be carried out by a Gas Safe installer (Green Choice Heating are Gas Safe registered).
- If you are replacing with a heat pump the installation has to be carried out by a member of a Competent Persons Scheme (Green Choice Heating are members of APHC).
- If you are replacing with a solar thermal water heating the installation has to be carried out by a member of the Microgeneration Scheme (Green Choice Heating are accredited members of MCS).

How to tell if your boiler is G-rated

If your gas boiler is over 15 years old it is very likely to be G-rated or worse. To be sure you can visit the Government Boiler Efficiency Database or the SEDBUK Boiler Efficiency Database.

Alternatively, if you would like to nominate us as your installer we can advise you.

How to Apply for the Scheme

Firstly, ask us to provide you with a quotation as you need this before you can apply for the voucher. Once you have our quote you can apply online or call the CO² advice line (0800 512 012).

The voucher will be posted to you and once received then you can proceed with the installation. If you start the installation before you receive the voucher it will invalidate it.

Once the installation is finished and you have paid for the installation you send back our invoice along with your voucher.

Payment of £400 is issued within 25 working days of receipt of the voucher and invoice.
